* My brother Tim typed these lists with an early program that would not record zero tenths of a second or a hundredth of a second ending with a zero to the correct number of places (for example: 11.0 was recored as 11 and 11.60 was recorded as 11.6).

The program also subtracted .24 seconds from FAT times for ranking purposes.

I have added the .24 seconds back to times on the list that I could identify as FAT times and placed them in the appropriate rank.

If either of these idiosyncrasies has led to error or if anyone has evidence of other errors in these lists, please contact me (Bill Miles) at:
