

# 1991 MINNESOTA TRACK and FIELD ANNUAL

**Tim Miles, Saint John's University**

**Bill Miles, Wayzata High School**

**Charlie Mahler, Gustavus Adolphus College**

## Thanks

Thanks to all coaches and others who sent results. Your efforts are critical toward making these lists more nearly complete. Thanks, too, for your support. Each order received adds to the zeal with which we continue our research and publication. Thanks to the Minnesota State High School League for readily making information available. Finally, thanks to Minnesota's high school track and field athletes (past and present) whose outstanding performances make this effort enjoyable.

## Mea culpa

Please forgive any errors or omissions and make us aware of them. We have done a rigorous search but are certainly aware that neither our 1991 lists nor our all-time lists are complete. We continue to search for outstanding marks.

## Timing

The National Federation Rule Book states that unless a timing system is fully automatic, times registered in one one-hundredth of a second must be rounded off to the next tenth of a second. (Example: 10.42 will be recorded as 10.5 unless fully automatic electronic timing is used.)

When fully automatic timing is used, time will be recorded in one one-hundredths (1/100) of a second.

In ranking performances, we added 0.24 seconds to manual times to approximate the fully automatic time equivalent. For example, a hand time of 11.0 seconds would be equivalent to a fully automatic time of 11.24 seconds.

## English/Metric

Our all-time Minnesota lists mix performances run at metric and English distances. Metric performances and their equivalents are listed. If the race was run at an English distance (yards), the actual performance follows name, school, and year in parentheses. Of course, where an event was run only at the English distance and is no longer contested, performances are listed as run.

The conversion factor for 110y/100m, 220y/200m, 440y/400m etc. is 0.9942. That is, multiply the English performance by 0.9942 to get the metric equivalent.
